Gary,

These are the clarifications as per our discussion to the BHHRA comments.

3. Section 3.1.2; page 15: A clear and transparent discussion of the inhalation pathway is missing from the report. This shall be included and discussed since VOCs, SVOCs, and metals are COIs. Depending on climate and temperature variations, volatilization of chemicals and release of metal dust can make the inhalation exposure route complete.

4. Section 3.1.4; pages 16-17: The BHHRA shall state in a clear manner why subsistence fishing was not considered for evaluation. Give justification why recreational fishing was the most conservative scenario for this site.

Thanks,
Dipanjana

D,

Here it is.

Thanks,

Gary Miller, P.E.
